

## Compliance.ai & LogicGate Setup

### LogicGate Setup

1. **Create Application under Build:** Create a new Application that you will use to capture the Compliance.ai regulatory intelligence and take actions (such as 'Regulatory Compliance')
  - a. It is recommended to create a Test Application and go through each of these steps through LogicGate and Compliance.ai
  - b. Once the Test application is working and confirmed, repeat the steps for the Live application

#### New Application ×

---

**Name**

**Type**

**Color**

**Icon**

[+ Create Application](#)

2. **Create a Workflow:** Create a new Workflow that you will use to bring in the Compliance.ai regulatory intelligence (such as 'Regulations', 'Documents', or 'Requirements')
  - a. Each workflow can be mapped to other workflows
  - b. Each workflow will have an 'Default Origin' and 'Default End' step
  - c. Workflow ID needs to be fetched using : Type: GET  
`https://your-company.logicgate.com/api/v1/workflows/step/{STEP_ID}`

### New Workflow ✕

---

**\* Workflow name**

**\* Record Prefix** ?

---

+ Create Workflow

3. **Create/Configure a Step:** A new origin step will be used to create a record using the Risk Cloud API (such as 'Document')
  - a. Step ID can be pulled via the browser's URL and should look like this:  
`https://your-company.logicgate.com/build/steps/{STEP_ID}`

4. **Create Fields:** Configure the type of fields that you want to be populated with values from Compliance.ai
  - a. The following fields must be created for "Documents".
    - i. "Document Title": text
    - ii. "Document Type": select, add in the values you want to see i.e. Examination Manual
    - iii. "Document ID": text
    - iv. "Code of Federal Regulations (CFR)": text

- v. "Jurisdiction": select, add in the values you want to see
  - vi. "Topics": text
  - vii. "Summary": text area, allow rich-text
  - viii. "Source": text
  - ix. "Effective Date": date picker
  - x. "Publication Date": date picker
  - xi. "PDF URL (on Compliance.ai site)": text area, allow rich-text
  - xii. "Web URL": text area
- b. Optionally, add any additional fields needed for the "Regulation" or "Requirement"

##### 5. **Map Value to each Field:**

- a. LogicGate uses currentValueMaps to map values to the proper Fields
- b. Confirm that each field is properly accepting the expected values

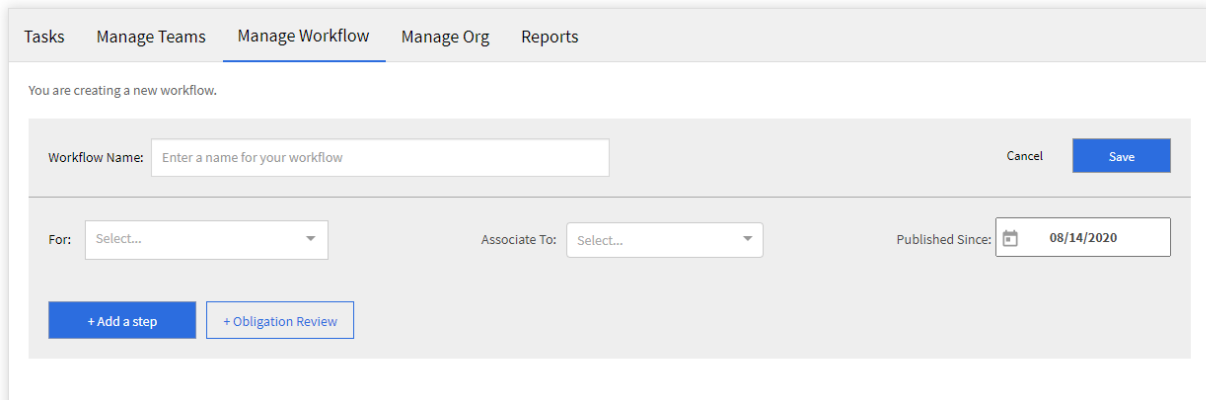

##### 6. **Obtain API Access Token:** While logged into your Account, navigate to Profile > Access Key to generate it. Share the Workflow ID, Step ID, and Access Key with Compliance.ai to enable the integration

For any LogicGate setup issues, Please contact

## Compliance.ai Setup

See steps below to set up a workflow that pushes documents and annotations through Service Connector

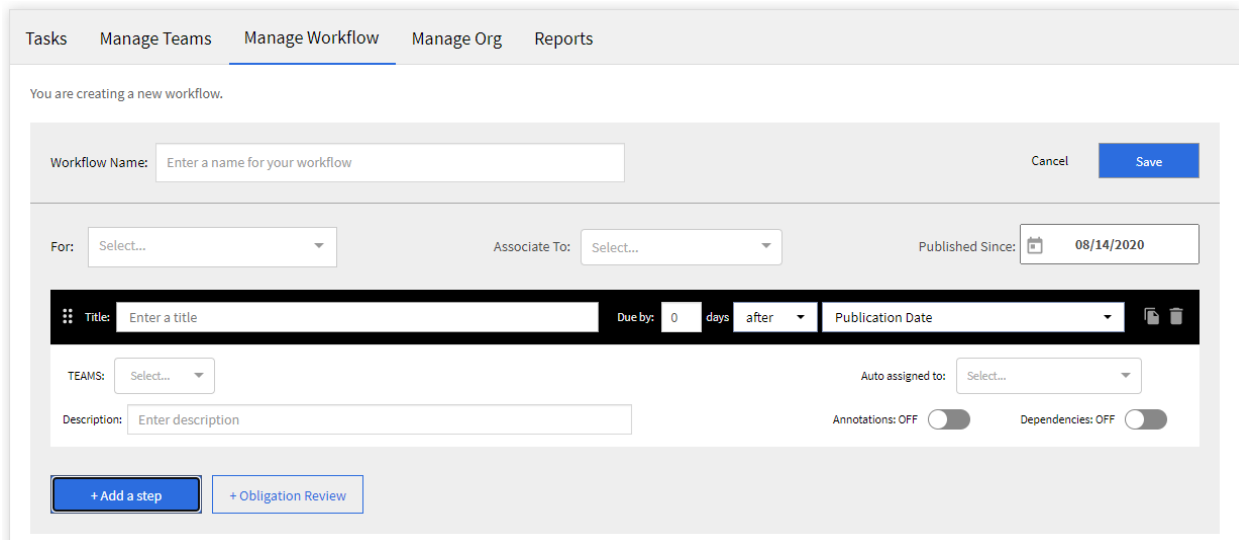

- 1. Set up a Compliance.ai Alert:** Using Compliance.ai's [Basic and Advanced Search](#) capabilities to surface relevant content, the user can then set up [Alerts](#) for this curated view to notify them of any future documents that are published.
- 2. Set up Compliance.ai Service Connector Workflow:** Go to Compliance.ai's [Manage Workflow](#) section
  - Select "Add a New Flow" and select the "start from scratch" option.
  - Name the Service Connector Workflow
  - Select the Alert, from step 1, you want to push future content in the "For" section.
  - Next, Select a past date you would like the Service Connector to start from. (**Note:** You can only go far as 1 month back)

The screenshot shows the 'Manage Workflow' section of the Compliance.ai interface. At the top, there are navigation tabs: 'Tasks', 'Manage Teams', 'Manage Workflow' (which is selected), 'Manage Org', and 'Reports'. Below the tabs, a message reads 'You are creating a new workflow.' The main form area contains the following elements:

- Workflow Name:** A text input field with the placeholder 'Enter a name for your workflow'. To the right of the field are 'Cancel' and 'Save' buttons.
- For:** A dropdown menu with 'Select...' as the current selection.
- Associate To:** A dropdown menu with 'Select...' as the current selection.
- Published Since:** A date input field showing '08/14/2020' with a calendar icon to its left.
- At the bottom of the form, there are two buttons: '+ Add a step' (a blue button) and '+ Obligation Review' (a light blue button).

- 3. Create The Service Connector Documents Step:** Select the "+Add a step" button and Fill out for the Following Fields:
  - Title: Push Documents to LogicGate
  - Auto assigned to: Select the Service Connector User Account, for example [support+abc-sc@compliance.ai](mailto:support+abc-sc@compliance.ai).

Tasks Manage Teams **Manage Workflow** Manage Org Reports

You are creating a new workflow.

Workflow Name:  Cancel Save

For:  Associate To:  Published Since:

Title:  Due by:  days after

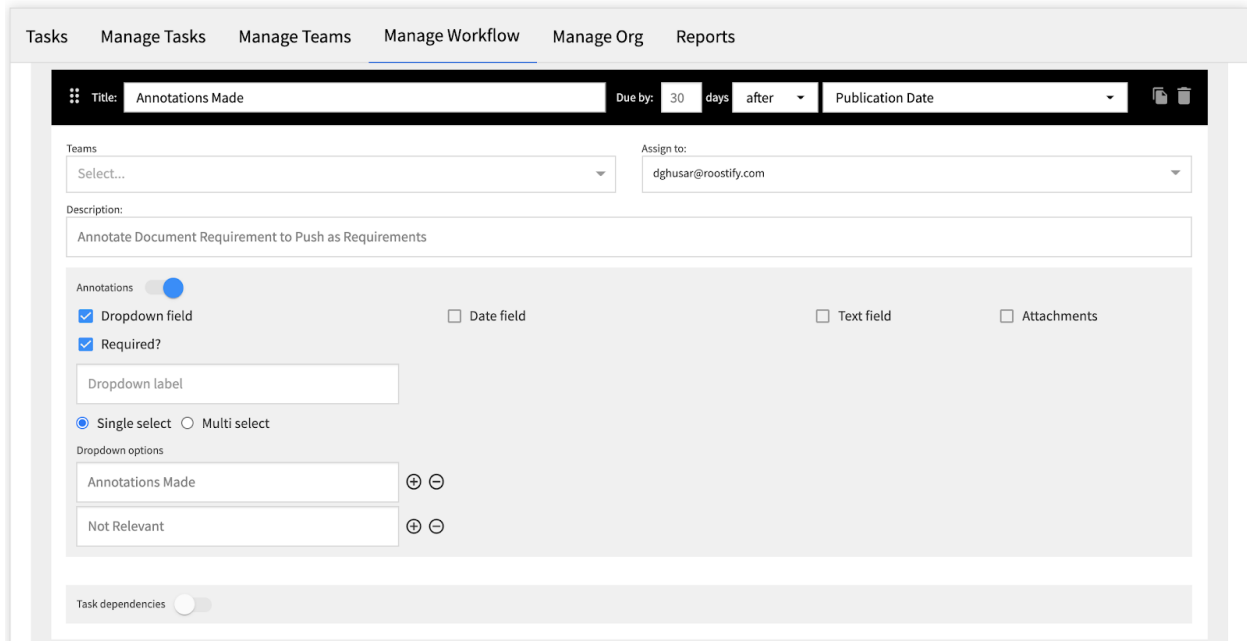

TEAMS:  Auto assigned to:

Description:  Annotations: OFF  Dependencies: OFF

+ Add a step + Obligation Review

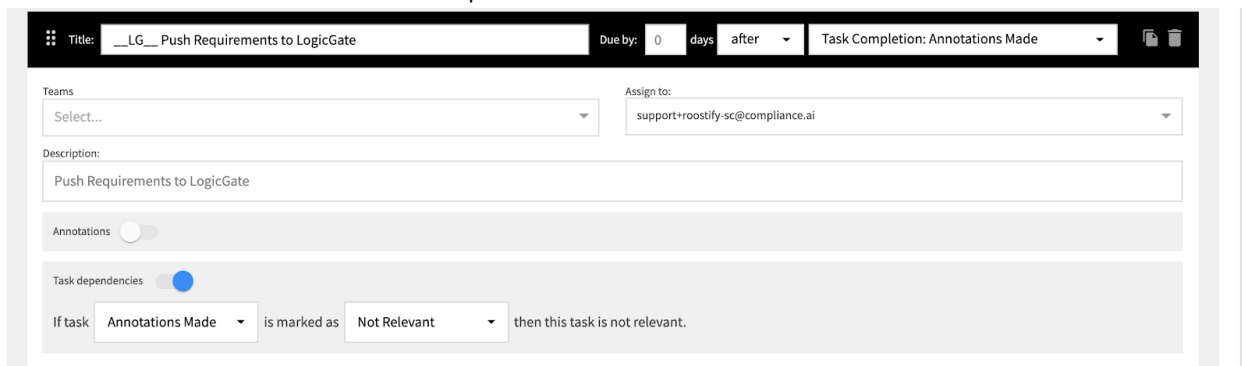

**4. Create the Annotations Step:** Select the "+Add a step" button and Fill out for the Following Fields:

- Title - i.e. Annotations Made
- Assign to
- Turn on "Annotations" module
  - i. Select "Dropdown Field" and "Required?"
  - ii. Name the "Dropdown label"
  - iii. Select "Single select"
  - iv. Add in the two dropdown options
    - 1. "Annotations Made"
    - 2. "Not Relevant"

The screenshot shows the 'Manage Workflow' tab in the Compliance.ai interface. The task is titled 'Annotations Made' and is set to be due 30 days after the 'Publication Date'. The description is 'Annotate Document Requirement to Push as Requirements'. The 'Annotations' module is turned on, and the 'Task dependencies' module is turned off. The configuration includes a 'Dropdown field' which is 'Required?'. The dropdown options are 'Annotations Made' and 'Not Relevant', with 'Single select' chosen.

- 5. Create The Service Connector Annotations Step** Select the "+Add a step" button and Fill out for the Following Fields:
- Title - i.e. \_\_LG\_\_ Push Annotations to LogicGate
    - i. Please include the \_\_LG\_\_ before the title
  - Auto assigned to: Select the Service Connector User Account, for example [support+abc-sc@compliance.ai](mailto:support+abc-sc@compliance.ai).
  - Turn on "Task dependencies" module
    - i. Set the "If task" dropdown as the step previously created in Step 4, in this case "Annotations Made"
    - ii. Set the "marked as" dropdown as the dropdown option previously created in Step 4, in this case "Not Relevant"

The screenshot shows the 'Manage Workflow' tab in the Compliance.ai interface. The task is titled '\_\_LG\_\_ Push Requirements to LogicGate' and is set to be due 0 days after 'Task Completion: Annotations Made'. The description is 'Push Requirements to LogicGate'. The 'Annotations' module is turned off, and the 'Task dependencies' module is turned on. The configuration includes a dependency rule: 'If task: Annotations Made is marked as: Not Relevant then this task is not relevant.'

- 6. Save the Workflow:** Once done any documents that are given tasks by this workflow will push to LogicGate, and then any annotations made on those documents through

- i. You can learn more about making annotations in our [Product Guide](#) under Annotations sections -> "2. Access documents to review and add Annotations"
- o When you have made annotations on the document or determined it is not relevant, go to the "Tasks" tab of the document and mark the task as "Annotation Made" or "Not Relevant"
- o Once done, annotations made on documents through tasks in Compliance.ai will be pushed to LogicGate as "Requirements"

For any Compliance.ai setup issues, Please contact [support@compliance.ai](mailto:support@compliance.ai)

## Review

Confirm the Documents and Annotations are populated correctly into LogicGate

Note - any changes made on the LogicGate or Compliance.ai setup after the initial implementation may cause syncing issues with the integration

- If there are any changes that need to be made, please email both LogicGate and Compliance.ai
